

### **David's Use of Medical Qi Gong**

***One of the most extraordinary examples of David's healing powers is regarding my father who was admitted to Transylvania Hospital on August 14, 2007 with a host of ailments. He was transferred to the Intensive Care Unit the next day with septicemia, bacterial pneumonia, cholelithiasis, and complications for diabetes. I was told to contact all my family because the doctor and staff believed that my father would not survive. I had my brother contact David and he came right over to the hospital. David stood by my father and performed acupuncture as well as Medical Qi Gong Therapy. After four long hours of watching my father's vital signs fluctuate drastically, as well as his being barely conscious, his vital signs began to stabilize and he began resting comfortably. David worked on my father all of that time.***

***The next morning, my father was alert and visibly doing better. He continued to improve, and after a little over a week, he was able to come home.***

***We owe so much to David Goldner for all he has done for my friends, my family and me. I am sure that if David hadn't treated my father that night that the outcome would have been much different than it was.***
