

STUDENTS PRAISE DAVID GOLDNER'S MEDICAL QI-GONG SEMINAR

"The week following David Goldner's Medical Qi-Gong two day class, I received a call from a friend whose husband was in the hospital. He had abdominal surgery 21 days ago and was presently in ICU for the third time now with septicemia. She said the doctors were talking about "there is a possibility of mortality". I asked my co-worker who had also taken the medical Qi-gong class if she would go to the hospital with me. After speaking with David for support, the next morning we went to see if we could help. My friend's husband was on a monitor and had a fever of 101; his heart rate had not been below 120 since surgery. His respiration was rapid and shallow and his eyes glassy. We used the techniques from class. When we finished, his temperature was 98.0, heart rate was below 100, and he was resting calmly. Also, his eyes were clearing and he said hey to me and smiled. The experience as my friend put it was "miraculous". It changed my perspective on the possibilities of healing. I feel so thankful for learning medical Qi-Gong."

-Susanne Boatwright-Young, BSN RN LMBT#04646
SES Faculty, North Carolina

"We both enjoyed your seminar very much. I would like to get together to go over some of those methods in greater detail. It would be interesting to experience some more bodywork also. ***My back felt much better after Sunday's seminar. You mentioned there was too much going on in my neck for the group to handle. You felt that? Interesting call!***"

— Robert Sable, Acupuncture Physician

"Immediately upon completing the two-day workshop with David Goldner, I was able to implement the techniques with success in my practice. The techniques are painless, relatively quick, and best of all, provide immediate results. I have found it easy to combine my traditional therapy and treatment modalities with Medical Qi-Gong. I feel confident that with the continued use of Medical Qi-Gong, my patients' medical conditions will improve."

— Emory E. Prescott, M.S. CCC-SLP, North Carolina

"I took David Goldner's class in 1999 when I was just out of Massage School; I had not taken my National Boards yet and I am convinced that his class helped me pass. At my massage school Chinese Medicine and the meridian system were really not addressed, and his class instilled a knowledge and love of this part of massage to this day. I am constantly amazed and fascinated by the intricacies of the human body and how it works; this course opened my eyes to a new aspect and applicability of energy medicine to my practice. I highly recommend this course to anyone."

-- Ann Blair Kennedy SC Licensed Massage Therapist (#2064)

"This seminar has added to my knowledge of Chinese Medicine and my understanding of the use of energy."

— S.C., L.M.T., Harrison, OH

"As a direct result from the rest of the class projecting their Qi towards me, I am now pain-free after 15 years of discomfort suffered from an auto accident. Remarkable seminar and experience."

— R.C., Realtor, West Palm Beach, FL

"Last night my husband had one of the deep scalene under the upper trapezius hurting and tied in knots. I was unable to reach it with the modalities I use, so I used projecting Qi, and the pain and tension melted away. I was excited and awed to have such results so soon after class."

— Z.F., L.M.B.T., Georgia

"My curiosity piqued, I quickly tested what I learned with results that continue to amaze me. This will most certainly add a new level to my practice."

— *G.O., L.M.B.T., Tennessee*

"Enjoyed David's authenticity, relaxed style and sense of humor. He was thorough and encouraging."

— *B.B., L.M.B.T., Raleigh, NC*

"David Goldner taught the fall semester 'Oriental Therapies' unit of MTH 120. All students circled 'excellent' for the question 'Was the instructor prepared with information pertinent to the topic?'"

-- *Ann Hibbard, BA, LMBT,
Therapeutic Massage Department Chair,
Gaston College (which offers an associate degree in
therapeutic massage), Dallas, NC*

"Mr. David Goldner has been associated with Daytona Beach Community College [for 7 years] and serves as an adjunct faculty member within the Continuing Education Division. Mr. Goldner instructs health professionals on the topic of massage therapy and his courses are in constant demand. His teaching style and classroom demeanor have always received high evaluation marks and I have personally received many calls from students commenting on his excellent classroom teaching. Mr. Goldner is certainly a valuable asset to this Division...."

-- *James L. Greene, R.N., C., D.D.,
Continuing Education Division,
Daytona Beach Community College,
Daytona Beach, Florida*

David Goldner's two-day class in Medical Qi-Gong was not only a delightful learning experience but, for me, was a healing experience as well. In the process of demonstration a student might be used as a recipient of treatment, as I was. The healing of my bladder problem was a profound experience. While this is a gift to the student who experiences it, the course is just as impressive because David is a pleasantly articulate teacher. His instruction is succinct, yet heartfelt. He hears all questions asked and thoughtfully explains his answers. The work material that I brought home from the training is a continuing educational Qi Gong guide that I will cherish and apply to developing the skill learned at this remarkable training.
